

TITLE INDEX

- Aesthetic assessment of gingival recession treated with connective tissue graft associated with low-level laser therapy on smokers – 35
- Antifungal effect of the extract of rosemary (*rosmarinus officinalis* L.) Checked on biofilm of *candida albicans* – 56
- Antimicrobial action and against endotoxin of gel and liquid chlorhexidine and sodium hypochlorite associated with surfactant - 16
- Antimicrobial activity of different clinical strains of lactobacillus rhamnosus on streptococcus mitis and streptococcus sanguinis – 52
- Antimicrobial activity of thyme (*thymus vulgaris* L.) Extract analyzed on *pseudomonas aeruginosa* biofilm – 57
- As an antimicrobial strategy for regenerative endodontics – 51
- Assessment of knowledge of dental students and dentists regarding tobacco consumption and their behavior towards smoker – 31
- Biocompatibility evaluation of titanium and titanium niobium zirconium samples nanostructured for biomedical use – 58
- Biofilm formation of staphylococcus *aureus* and *pseudomonas aeruginosa* in a different titanium alloys – 59
- Bond strength of a universal adhesive system to eroded dentine after different treatments of organic matrix - 25
- Bond strength of zirconia (ytz-p) and resin cement: effect of sandblasting and different application solutions - 23
- Case report: chronic kidney disease and periodontal disease – 02
- Comparative study using electromyography activity of masseter and temporal muscles after use of muscle relaxant and steroidal anti-inflammatory in single dose during included third molars extraction – 32
- Comparison between two surgical flap designs associated with connective tissue graft for the treatment of gingival recession. Pilot study – 34
- Comparison of local therapies for the treatment of chronic periodontitis in diabetic patients: pilot study – 36
- Computed microtomography *in vivo* analysis in porous samples with different titanium alloys – 45
- Cytotoxicity of *cynara scolymus* (artichoke) *schinus terebinthifolius* (aroeira) and *camellia sinensis* (green tea) glycolic extracts – 50
- Dental pulp cavity obliteration after trauma – 04
- Effect of different surface treatments on the adhesion between peek and veneering resin – 10
- Effect of feldspathic ceramic machined disposed in multilayers by finite element analysis - 05
- Effect of silica infiltration on bond strength between resin cement and y-tzp zirconia - 13
- Effect of whitening mouthwash on color change of stained composite resins - 14
- Effects of cleaning method and simulated radiotherapy on optical and mechanical properties of y-tzp ceramics - 18
- Effects of clinical isolates of lactobacillus spp. On streptococcus mutans: study of probiotic potential– 60
- Evaluation by mtt cytotoxicity and osseointegration of anodized titanium surfaces with pulsed current and direct current– 41
- Evaluation of cellular metabolic activity *in vitro* on different samples of porous titanium alloys aiming for biomedical applications – 48
- Evaluation of clarithromycin as an adjunct to ultrasonic debridement for the treatment of aggressive periodontitis: a pilot study – 29
- Evaluation of oral hygiene in complete dentures users associated with the prevalence of diagnoses of oral lesions - 15
- Evaluation of the influence of degree of conversion, elastic modulus and volumetric shrinkage in shrinkage stress of resin composites - 21
- Evaluation the influence of curing time on biological properties of seven endodontic sealers – 53
- Evaluation of different intra-canal medications against Ita: an *in vitro* study - 09
- Extensive ameloblastoma in the mandible: a case report that emphasizes the importance of immediate and proper treatment - 03
- Frequency-dependent effect of ethanol consumption in long-term in the alveolar bone of adult rats - 08
- Impact of preparation design, ceramic and occlusal contact on the stress distribution in laminate veneers - 17

- *In vitro* effects of different irrigants and endodontic protocols in the reduction of Ita cytotoxicity in macrophages – 49
- Influence of areas of recession, papillae and periodontal biotype in the outcome of root coverage with or without Illt application – 37
- Influence of different physical and chemical treatments in adesion of periodontal ligament fibroblasts to the root surface simulating avulsed teeth - 12
- Influence of occlusal geometry and restorative materials on load-to-fracture and stress distribution of total crowns - 22
- Influence of parasympathetic neuromodulation on bone tissue and serum levels of rankl and opg in mice – 46
- Influence of wettability and modulus of elasticity of different titanium alloys in bone formation - 07
- Investigation of the antifungal effect of essential oil *hyptis spicigera* on *candida albicans* – 47
- Levels of inflammatory cytokines in down's syndrome patients with periodontal disease before and after periodontal treatment – 33
- Living without caries program - reporting 15 years of experience – 39
- Mental nerve neuralgia: a literature review – 42
- Novel easy-intracanal-adaptable 3d-triple antibiotic paste mimic scaffold
- Obtaining the maxillo-mandibular relationship: partial fixed prosthodontics with articulated partial models – 38
- Oral spindle cell lipoma: a case report - 01
- People homeless: drug addiction, oral health condition and it's impact on quality of life - 27
- Polyetheretherketone adhesion (peek) to human dentin : effects of different surface treatments – 54
- Prevalence of the reasons relating the replacement of restoration in dentistry – 30
- Primary endodontic infection: quantification of endotoxins and their relationship with signs/symptoms and volumetry of the lesion and root canal - 28
- Relation between clinical and histopathological features on a chemically induced model of squamous cell carcinoma – 55
- Retorque of abutments screws with coating of diamond-like carbon: analysis of torque maintenance after mechanical fatigue - 11
- Roughness and atomic force microscopy of composite resins submitted to different polishing methods - 26
- Structural characterization and flexural strength of resin cements subjected to ionizing radiation through γ -tzp ceramics - 06
- Study of microdeformations around internal hexagon implants and around implants with plateau, under vertical load application - 20
- Study of probiotic action of different lactobacillus species in candida albicans – 44
- Supraorbital nerve neuralgia: a literature review – 43
- Surface roughness of dental materials after toothbrush abrasion with different dentifrices - 24
- Synthesis and characterization of polymethylmethacrylate nanofibers - 19
- The use of oral rehabilitation as a means of awareness on general health. Case report: rehabilitation for prosthetic eye – 40
